Change Log POE

COUNTIFY

OPSC7312 POE
VARSITY COLLEGE

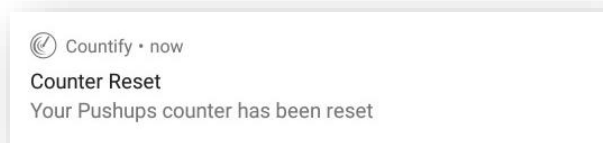

Current Release

4th November 2024 version POE

User Manual Link

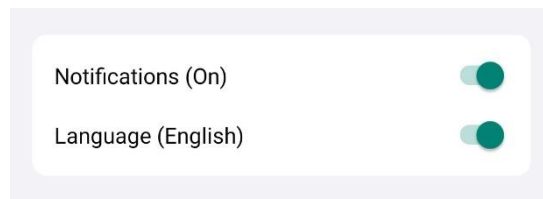

Updates to Countify

1. **Push notifications** added to remind user when the counter will soon reset with associated local classes.

2. **Data syncing** with **SQLite** to **Firestore** for offline to online syncing for user data (Counters and settings).
3. Counters now reset according to their **repetition** value which causes the **push notifications**.
4. Users can now **delete** their account in the settings page with the **delete button** and will permanently delete the account and log out *Countify*.
5. **Loading dialogs** have been added to indicate **active processes**.
6. **Two new pickable options** for the repetition value are now available when creating a counter, "**30 Seconds**" and "**15 Minutes**".

7. **Theme** button has been removed.

8. The user can no longer use the stack to re-enter the application after logging out. (App closes when user tries to exploit the stack now).
9. *Countify* now has a custom dynamic application icon & name in the android device's display. (Now says "Countify" instead of package.countify ect)
